#### **DETAILED ACTION**

### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Larry Liberchuk (registration no. 40352) on September 28, 2005.

## IN THE CLAIMS:

Re claim 9: Amend claim 9 as followed

- 9. A data-processing system, comprising:
- a hardware circuit [HARD];

a communication device [COM] for communicating a contention convention signal and a word to said hardware circuit [HARD] from one of a microprocessor [PRC] and an electronic module [MOD]; and

wherein said hardware circuit includes means for implementing one of a direct convention and an indirect convention of an order of bits of the word as a function of a value of the convention signal.

## Allowable Subject Matter

- 1. Claims 1-9 are allowed.
- 2. The following is an examiner's statement of reasons for allowance:

Art Unit: 2876

The record of prior art fails to teach or fairly suggest a data processing system, including a microprocessor; a communication device communicating with an electronic module intended to send a convention signal to the microprocessor; and a hardware circuit allowing an inversion of an order of bits of a word as a function of a value of the convention signal during a transfer of the word between the electronic module and the microprocessor.

Chiang (US 6,574,776) teaches a data processing system, comprising a EDC/ECC-P processor, a memory unit, and a EDC bit order inverter.

Van Rensburg et al. (US 2003/0004891) teaches the electronic module, which is a SIM card.

Muwafi (US 5,978,822) teaches a circuit which comprises switches and a post shift unit 80 to shift (to the left or right) the bits of each value processed.

However, Chiang, Van Rensburg, and Muwafi, taken alone or in combination thereof, fails to teach or fairly suggest a data processing system, including a microprocessor; a communication device communicating with an electronic module intended to send a convention signal to the microprocessor, and a hardware circuit allowing an inversion of an order of bits of a word as a function of a value of the convention signal during a transfer of the word between the electronic module and the microprocessor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Application/Control Number: 10/015,965

Art Unit: 2876

### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kimberly D. Nguyen whose telephone number is 571-272-2402. The examiner can normally be reached on Monday-Friday 7:30-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael G. Lee can be reached on 571-272-2398. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
